**WARNING**

The practical sessions involve intense physical activity. Please inform us upon registration, as well as your supervisor upon arrival on site, of any physical ailments or injuries which may require limited involvement in equipment deployment training and exercises.

The registration fees indicated are the fees per participant. They cover the cost of the hotel, transport between the hotel and Cedre, lunches, course materials and personal protective equipment provided for each participant for courses involving practical sessions.

Registration on the course is not confirmed until the duly completed registration form has been received. If participants withdraw from the course less than 8 days before the course start date, 50% of the course fee will be charged.

According to the French order of 16th August 2012, signed by the French Water Director for the Ministry of State, Cedre is qualified by article L.211-5-1 of the French Code of the Environment to organise training courses on

the management of and response to oil and chemical spills at sea, in sea ports, on the shoreline, in lakes and in watercourses.

According to the Prime Minister's instruction dated 4th March 2002 relating to pollution response in the marine environment (national POLMAR documentation), Cedre is tasked with continuing its training efforts in pollution response.

The professional training courses run by Cedre since 1985 are targeted towards engineers, technicians and managers working for industrial companies and service providers, administrations, public establishments, local authorities and associations.
