Aims

- Anticipate the fate and behaviour of oil spills in the aquatic environment
- Gain concrete, practical knowledge of response strategies and techniques in inland waters
- Select appropriate equipment to respond to a spill
- Contribute to the development of a contingency plan

► Practical sessions in a natural environment and at the Finistère fire and rescue service's departmental training centre (p.8)

Content

- Spill issues and challenges
- Basic principles of response in inland waters
- Behaviour of oil spills in the environment
- Containment:
 - manufactured booms
 - custom-made barriers
- Recovery operations
- Spill response on land: in soil, gutters, channels and ditches
- Riverbank clean-up
- Waste management
- Principles of crisis management and contingency planning
- Feedback from past incidents

Format

- Theory lectures in the conference room
- Tour of Cedre's facilities
- Practical exercises in the natural environment using simulants and at Cedre's technical facilities with release of real oil
- Resources available on Cedre's online training platform

Assessment

- Oral questions
 - Assessment during an autonomous exercise
- Issue of a course completion certificate

Participant feedback

- 99.10% satisfaction in 2023

Prerequisites: read the specific provisions relating to spill response in inland waters in the applicable contingency plans
