Do you have a disability? To ensure we best accommodate your needs, please contact: [formation@cedre.fr](mailto:formation@cedre.fr)

### Aims

- Identify spill risks related to maritime transport
- Anticipate the fate and behaviour of oil and chemical spills in the aquatic environment as well as hazards for humans and the environment
- Seek out initial information and effectively manage the initial stages of the response in the event of a spill
- Gain concrete knowledge of the actions and strategies to be implemented
- Understand the organisation and the regulatory and legal framework for response at sea
- Be capable of joining an incident command centre
- Be involved in the development of contingency plans

### Content

- Legal foundations:
  - Context and challenges of spills at sea
  - The right to intervene
  - Liability and compensation issues
  - Roles and responsibilities: maritime authorities, MRCC, Navy...
- Understanding spills at sea
  - Behaviour of oil in case of a spill at sea
  - Detection of slicks at sea
  - Decision support systems
- Response strategies and techniques: dispersion, containment and recovery
- Methodology and crisis management: general principles, methodological approach, emergency organisation, onshore/offshore interface, crisis communication
- Feedback from past incidents

### Format

- Theory lectures in the conference room
- Tour of Cedre's showroom, laboratory and experimental facilities
- Large-scale tabletop exercise
- Resources available on Cedre's online training platform

Theory

Tabletop exercises

### Assessment

- Oral questions
- Tabletop exercises

All participants receive a certificate upon course completion

Prerequisites: read up on the regulatory framework for maritime emergencies off the relevant coastline

Registration: download the registration form using the QR code, complete it and send it to [formation@cedre.fr](mailto:formation@cedre.fr)

For administrations under the DGAMPA or for the French Navy, see the page on course registration
